

The lifebuoy position indicator light is a life-saving device equipped on a life jacket or a lifebuoy. It is suitable for indicating the position of the life jacket or the lifebuoy at sea at the time of the ship's water drop and rescue personnel for the purpose of rapid rescue.

The lifebuoy light uses LED flashing technology and is suitable for offshore or offshore merchant ships in harsh environments. Compact design, fully waterproof, anti-interference, anti-corrosion, lightweight and volumetric transportation. all

The specifications are as follows:

- Certification
- 5 years life
- Battery does not need to be replaced and maintained
- Standard bag and cable
- Compact design
- Embedded transvestite design
- Advanced LED lighting technology, low energy consumption and enhanced durability
